With over 20 years of experience in computing and systems, and more than 5 years specializing in frontend development, I have worked with tools such as Angular, React, and Astro.js. I also have knowledge of TailwindCSS, jQuery, PHP, and basic programming in Python. Additionally, I have backend development experience with Nest.js. My ability to learn new programs and technologies allows me to quickly adapt to different projects and environments.

My primary focus is frontend development, with strong experience in Angular, creating dynamic and responsive user interfaces. I am committed to continuous learning and updating my skills to consistently deliver robust and scalable technological solutions
